Building Fastrack @ cosmosys | Full Stack Development lead | End to End Product Development

Islāmābād, Pakistan

Summary

Passionate about using technology to solve complex problems, I am currently expanding my knowledge in data science at the Foundation for Advancement of Science and Technology (FAST), set to graduate in 2025. With a dual role as a Data Science/AI Solutions Engineer and Full Stack Developer, I specialize in data analysis, visualization, and pipeline design, providing effective and innovative solutions for various business needs.

Throughout my journey, I have not only developed a deep understanding of the technical aspects of computer science, but also honed my communication and leadership skills. These skills have allowed me to excel in team settings, creating a collaborative environment that drives project success. My approach to problem-solving is thorough and detail-oriented, as I find myself personally invested in each project I undertake.

Computer Science isn't just my field of study - it's my passion. I'm continually driven by the opportunity to explore new areas of this ever-evolving field, from Virtual Reality to System Engineering and Computer Hardware, the list goes on and on! The satisfaction I get from using technology to create solutions that make my clients happy is immeasurable.

Whether it's designing data pipelines, working on a full-stack application with the best fitting tech stack, or providing AI solutions, my focus is always on delivering the highest quality results. This is more than just a job to me, it's what I love doing, and I look forward to taking on new challenges and opportunities in the tech industry.

Please don't hesitate to reach out and connect with me. I'm always eager to engage in enriching conversations, explore potential collaborations, or simply get to know more individuals in the tech community. Looking forward to our interaction!

Experience

Fastrack

Chief Operating Officer

May 2024 - Present (1 year 2 months)

Islāmābād, Pakistan

AIM Lab

Co-Project Lead

June 2024 - September 2024 (4 months)

Islāmābād, Pakistan

I oversee the frontend development and UI/UX design efforts to work on a Global Enterprise Software.

My role involves leading a multidisciplinary team, mentoring interns throughout the development of the product, and collaborating with industry partners and clients to support the initiative.

FAST Developers Club

President

September 2023 - September 2024 (1 year 1 month)

Islāmābād, Pakistan

Driven by the gap between Pakistan's booming CS industry and its academic system, I became President of FAST Developers Club to inspire a passion for learning among students. My mission is to bridge academia and industry, cultivating skilled professionals, innovators, and problem-solvers.

Responsibilities:

- Drove strategic collaborations with industry professionals and corporate representatives.
- Organized sessions, seminars, and workshops aligning formal education with industry needs.
- Facilitated cross-functional meetings with engineers, developers, and academic professionals.
- Provided personalized mentorship to peers and junior students.

Achievements:

- Teams from FDC won over 5 hackathons, encouraging students to become the best at what they do.

Upwork

Data Science & AI Solutions Provider

January 2023 - June 2024 (1 year 6 months)

Islāmābād, Pakistan

As a Data Science & AI Solutions Provider on Upwork, I've had the opportunity to work on a wide variety of complex, data-centric projects for diverse clients around the globe. Leveraging my in-depth knowledge in Data Science, AI, and Machine Learning, I have delivered bespoke solutions that drive insights and business value from large data sets.

I have carried out numerous projects involving data visualization, big data analytics, and pipeline encryption. My work often involves utilizing robust technologies and frameworks such as Hadoop, PySpark and Kafka which allow me to efficiently process and analyze large volumes of data. Leveraging tools such as Kubernetes for developing AI workflows has allowed me to do my work very efficiently.

As a freelance consultant, I am not only a technical expert but also a collaborative partner to my clients, focusing on understanding their unique needs and delivering solutions that align with their business goals.

ProLution

Lead Software Engineer

August 2023 - May 2024 (10 months)

London Area, United Kingdom

At Prolution, I led the development of cutting-edge software solutions, focusing on creating a sophisticated coding assistant that provides business insights to stakeholders.

Worked with LLMs and the tree-sitter library to create a codeparser which gave insights in return.

Integrated Codium, enhancing code quality and developer productivity.

Worked with Neo4j, Mermaid.js to visualise the codebase and it's insights.

Built a robust React frontend for seamless user experiences.

Lead a team of engineers, Guided the whole software development process to completion

Sakura Limited
Full-stack Developer
May 2023 - February 2024 (10 months)
Islāmābād, Pakistan

Led the development of an ERP solution for a Japanese car trading company that automates tasks, slashing manual work by 90% and paperwork by 60% through global shipment tracking, payment ledgers, bank connections, and more.

Responsibilities:

- Spearheaded the creation of an ERP solution for a Japanese car trading company, utilizing Flask, Gunicorn, and Python to build a robust and scalable backend.
- Deployed the application on Linux VPS with load balancing, ensuring high availability and reliability.
- Set up continuous integration and deployment pipelines using GitHub Actions to automate testing, build, and deployment processes.
- Designed and implemented a relational database schema using PostgreSQL, optimizing for performance and scalability, and integrated Redis for caching.
- Developed a microservices-based architecture, enabling modularity and ease of maintenance.
- Worked extensively with various APIs for payment processing, shipment tracking, and bank integrations to automate workflows.
- Led a cross-functional team of engineers, developers, and academic professionals, ensuring effective communication and collaboration.
- Maintained comprehensive technical documentation to ensure knowledge sharing and onboarding efficiency.

Achievements:

- Reduced manual labor by 90% and paperwork by 60%, significantly enhancing operational efficiency.
- Delivered a tailored solution that met the client's needs, resulting in high satisfaction and positive feedback.
- Implemented advanced technological solutions that set a new standard for efficiency and automation in the car trading industry.

theNode
Frontend Developer

August 2022 - January 2023 (6 months)

Islāmābād, Pakistan

Managed the development process using sprints and daily stand-ups, building user interfaces with ReactJS and SvelteKit while contributing to full-stack development and CI/CD with GitHub Actions and Microsoft Azure.

Education

National University of Computer and Emerging Sciences

Bachelor's in Data Science, Computer Science · (August 2021 - August 2025)

Beaconhouse

A level, Pre-Engineering · (August 2019 - August 2021)
